

# MATHEMATICAL PROOF OF A CREATOR

A man named Bruce Harvey, who is a genius, has done great work in the area of physics. I'm grateful to him for his work, and I'm grateful to the very few scientists that have learned to go beyond *self* in their endeavor to come upon the truth.

$$e^{-x} = \lim_{n \rightarrow \infty} \left(1 - \frac{x}{n}\right)^n$$

$$m_e = m_{pg} = m_{og} = m_r e^{\frac{3}{2}} \quad m_r = \gamma m_p \quad m_i = \gamma m_p e^{-\frac{3}{2}}$$

$$c^2 \delta m = m \delta \Phi$$

$$\frac{dm}{m} = \frac{d\Phi}{c^2}$$

$$\ln(m) = \frac{\Phi}{c^2} + K$$

$$m = m_0 e^{\frac{\Phi}{c^2}}$$

Assuming  $E = mc^2$

$$E_0 = m_0 c^2 \quad E_\phi = E_0 e^{\frac{\Phi}{c^2}}$$

$$E_{el} = \frac{q^2}{8\pi \epsilon_0 a} \quad E_{ps} = \frac{q_1 q_2}{8\pi \epsilon_0 r} \quad E_{ke} = \frac{H_0 q^2 v^2}{12\pi a}$$

$$[M] \leftrightarrow (e^{\frac{3}{2}})^m [M] \quad [L] \leftrightarrow (e^{\frac{3}{2}})^l [L] \quad [T] \leftrightarrow (e^{\frac{3}{2}})^t [T] \quad [Q] \leftrightarrow (e^{\frac{3}{2}})^q [Q]$$

$$\text{Clocks } [T] \leftrightarrow [T] \left(1 - \frac{M}{c^2}\right)^{-1} \quad \text{Speed of light } [L][T]^{-1} \leftrightarrow [L][T]^{-1} \left(1 - \frac{M}{c^2}\right)^2$$

$$\text{Charge } [Q] \leftrightarrow [Q] \quad \text{Energy } [M][L]^2[T]^{-2} \leftrightarrow [M][L]^2[T]^{-2} \left(1 - \frac{M}{c^2}\right)^3$$

(i)  $t = -1$  (ii)  $l - t = 2$  (iii)  $q = 0$  (iv)  $m + 2l - 2t = 1$   
two are answers and the other two solve easily to give

$$l = 1 \quad m = -3 \quad \text{OH!!!}$$

# The Cosmos is The Energy

by Kerry Craig Walker

Hmmm...  $m = -3$ . This shows that things are not so simple because it demonstrates that "mass" is not mass as we once thought. In fact there is no such thing as "mass", as physics has wrongly assumed in the past. All mass is in fact matter being held together by *energy forces* and therefore there is no "mass" as we have come to know it (this does not mean that "mass" cannot be used in certain conventional equations because of its components of matter that make up the energy we call "mass"). This puts questions on our theories about gravity and brings in space-time curvature and possibly other unknown components.

This is my theory based on the ability for the cosmos to utilize matter and energy along with electromagnetism, and possibly other unknown components, to bring about a "directive mind" that can influence mutations in life forms by directing these designs in a specific direction. This energy may also affect matter in the universe in different ways. It is important to note that this is not an energy that has complete control—on the contrary—it has a very limited control.

This changes everything! There have been errors in the conclusions by Einstein's theories and other theories of the past and they have yet to be corrected. The idea that God made everything and that everything is the same everywhere and for everyone, is one of the problems that created these errors.

The fact is there is no "God" as we have believed there to be, and the energy of the cosmos is capable of a limited directive intelligence, but this energy has nothing to do with the "God" of any of the many religions.

The problem is our brains have come to incorporate thought and, therefore we are programmed environmentally, biologically, and genetically, like computers - we are Catholics, Protestants, Buddhists and so on. We are conditioned. We must come to realize, to see actually—actually, not theoretically, or ideologically—but actually see that we are programmed? It cannot be just a casual observation. If you are actually programmed do you realize the consequences of being programmed? One of the consequences has been hatred, or war, or separating yourself from others. If one realizes that you are being programmed, pressurized, preached at, and if one really sees that, you abandon it, you don't want a formula for it. The moment you have a formula then you are caught back in it. Then you become programmed again because you have your program and the other fellow tries to give you another program. So what is important is to realize the actuality of being programmed, not intellectually, but actually, with all of your heart, all of your blood, and all of your being. This also goes for our intellect. We are being taught that our intellect is all that is important, but this intellect, with its knowledge, is creating the same nonsense.

Now to get back on track—The *energy* that I'm speaking of here that is composed of many complex components that bring about an actual capability of intelligence with a limited and flawed creative ability. This is not Intelligent Design as put forth by the IDiots that support this nonsense, nor is it the Creative Intelligence as put forth by the Christians, or anyone else. This is merely a very complex combination of matter, energy, kinetic energy, protons, electrons, neutrons, quarks, cosmic rays, dark energy, neutrinos, electromagnetism, etc. in an infinite cosmos that, by the combination of these components in a specific

cosmic formula, has the ability to “think” in an entirely different context of thought, as we know it. In fact it has nothing to do with “thought”. This is the *energy* behind creation, but not as any religion has related. It has absolutely nothing to do with any religion and it is a “natural” energy and not a supernatural energy or a supernatural “being”. In fact, when the mechanisms of thought stops in the human being, and the human goes beyond the conditioned self and to the natural unconditioned state, there is a natural connection between the human brain and this energy. Just as there is order in the cosmos, this brings about an order or harmony to the brain, and the brain becomes part of the cosmic mind, thus going beyond the illusions of self. Simply put we are part of this energy—we are energy. Quite literally,

everything is *energy*. This means we came from the cosmos; this means everything came from the cosmos, and that we are part of the cosmos and that we will probably return to the cosmos. This work is mathematical proof that there is a Creative Energy of this universe... This is proof that there is a CREATOR.

$$-m - 3l + 2t + 2q = -2 \Rightarrow \epsilon_0 \rightarrow e^{-2q} \epsilon_0$$

$$m + l - 2q = -2 \Rightarrow \mu_0 \rightarrow e^{-2q} \mu_0$$

$$c = \frac{1}{\sqrt{\epsilon_0 \mu_0}} \Rightarrow c \rightarrow e^{-2q}$$

$$R_c = \sqrt{\frac{3M}{4\pi\rho}}$$

When given a combination of matter, energy, and electromagnetism, with other specific components, and unfathomable amounts of these components, we get an energy that has “intelligence”. Is this so difficult to understand? Although this “intelligence” is not the same kind of intelligence as that of the human brain or the brain of any other animal on earth, for all practical purposes the cosmos is our maker and it is the creative intelligence behind life, non-life, and behind the universe itself. There is no need to have a maker

for the cosmos, because it was already there. The cosmos can direct the mutations in organisms by different means, such as cosmic rays and neutrinos, and probably some other yet to be found components.

This is not "far out". Your religion is what is "far out", and atheism is a religion, a belief system. This is reality. This is fact. You don't have to understand these complex formulas to understand the truth of this. Understanding this is the only hope for mankind, for the survival of man and woman. For the survival of this awesome planet and most everything on it—which will most likely never survive—but it wouldn't have lasted but so long anyway. The natural end will eventually come and there will be nothing we can do about it. If we don't destroy this planet and everything on it by self will and stupidity, it will still eventually come to an end. The polarity is already beginning what is called "spotting" and after this occurs it is only a matter of time before the magnetic field dissipates and finally gives out completely...at this point the core will begin to cool down and the planet Earth will begin to die...and this is only if this happens before our sun grows bigger and destroys this planet by heat...It's in the hands of mankind and if he will get out of the way it's all in the hands of the Creator.

Maxwell's wave equation  $\nabla^2 \varphi - \frac{1}{c^2} \frac{\partial^2}{\partial t^2} \varphi = 0$  and Poisson's equation  $\nabla^2 \varphi = \frac{\rho}{\epsilon_0}$

are special cases of  $\nabla^2 \varphi - \frac{1}{c^2} \frac{\partial^2}{\partial t^2} \varphi = \frac{\rho}{\epsilon_0}$

now  $\frac{\partial^2}{\partial r^2} = \frac{dx}{dt} \frac{\partial}{\partial x} \left( \frac{dx}{dt} \frac{\partial}{\partial x} \right) = v^2 \frac{\partial^2}{\partial x^2}$ . Upon expanding  $\nabla^2 \varphi$  and collecting terms

$$\left(1 - \frac{v^2}{c^2}\right) \frac{\partial^2}{\partial x^2} \varphi + \frac{\partial^2}{\partial y^2} \varphi + \frac{\partial^2}{\partial z^2} \varphi = \frac{\rho}{\epsilon_0}$$

Making the substitution  $x = \sqrt{1 - \frac{v^2}{c^2}} x'$   $y = y'$   $z = z'$

$$\left(1 - \frac{v^2}{c^2}\right) \frac{\partial^2}{\partial x^2} = \frac{\partial^2}{\partial x'^2} \quad \therefore \quad \frac{\partial^2}{\partial y^2} = \frac{\partial^2}{\partial y'^2} \quad \therefore \quad \frac{\partial^2}{\partial z^2} = \frac{\partial^2}{\partial z'^2}$$

reduces the equation to  $\frac{\partial^2}{\partial x'^2} \varphi + \frac{\partial^2}{\partial y'^2} \varphi + \frac{\partial^2}{\partial z'^2} \varphi = \frac{\rho}{\epsilon_0} \Rightarrow \nabla^2 \varphi = \frac{\rho}{\epsilon_0}$  in  $x'y'z'$

Electricity and magnetism = electromagnetism

$$\partial x = \sqrt{1 - \frac{v^2}{c^2}} \partial x' \quad \gamma = \frac{1}{\sqrt{1 - \frac{v^2}{c^2}}}$$

The kinetic energy  $E_m = \frac{1}{2} m v^2$  of an electron is stored in its magnetic field:

$$\vec{B} = \mu_0 \vec{v} \wedge \vec{D} = \frac{\mu_0 q}{4\pi r^2} \vec{v} \wedge \vec{r}$$

$$E_m = \int_{\text{volume}} \frac{1}{2\mu_0} B^2 = \frac{\mu_0 q^2}{12\pi a} v^2$$

where  $a$  is the radius of the electron.

$$E_m = \frac{\mu_0 q^2}{12\pi a} v^2$$

$$\frac{-q^2}{4\pi v a r} = 2 v q n \Phi_0 \quad (1)$$

We can also write the kinetic energy as  $\frac{1}{2} m u^2$  where  $u = 2\pi r v$  is the electron's velocity.

$$\frac{1}{2} m (2\pi r v)^2 = r q n \Phi_0 \quad (2)$$

We can solve equations (1) and (2) to give:

$$r = \frac{4\pi v \Phi_0}{n m} \quad v = \frac{1}{n^2} \frac{q m}{32 \Phi_0^2 \epsilon_0^2}$$

These are the equivalent of Bohr's result which may be obtained by substituting  $\Phi_0 = \frac{h}{2e}$ , the modern definition of the fluxoid quantum.

$$E_m = v q n \Phi_0 = \frac{-1}{n^3} \frac{q m}{32 \Phi_0^2 \epsilon_0^2} q n \Phi_0 = \frac{-1}{n^2} \frac{q^2 m}{32 \epsilon_0^2 \Phi_0^2}$$

PHOTON

$$E = \frac{c^2 \Phi}{\delta l}$$

FLUX TUNNELS

$$a = \frac{\mu_0 q^2}{6\pi m} = 1.878 \times 10^{-15}$$

magnetic field strength of the tunnel wall;

$$B = \frac{\mu_0 n r q \gamma}{2a\pi} = 6.3 \times 10^9$$

HIGHER ORBITAL

$$t_n = v_n q \quad t_n = \frac{h}{\gamma v} \quad \mathcal{E} = -\frac{q}{4\pi\epsilon_0} n \Phi_0$$

There is an intelligence within the INFINITE cosmos that is completely different than the intelligence we use with our brains...It also communicates and "sees" in a different way. But, the fact is, mathematically, there is a Creative Intelligence, and you can connect with it...if you get out of the way and go beyond all realms of deception and go beyond your conditioning....I have shown mathematically and by way of the many complex designs through evolutionary processes, that an outside energy or cosmic energy, a Higher Power, a Great Spirit, or Creative Intelligence, or Creator, or God...the name is not the thing...does in fact exist.
